OVER MILLION EMPLOYES RECEIVE FORTY PER CENT. OF RAILWAY EARNINGS

Interesting Figures Showing Relation of Public Carriers to the Public.

HOW SECURITIES ARE HELD.

Question of Railroad Rate Legislation Affects Eighth of Population of U.S.

CHICAGO, June 3 .- Figures which havership of the railroads in the United States demonstrate that in no country on the earth are the railways more truly the railways of, by and for the people than in America. Holders of the stocks and bonds of American railroads number nearly a million persons.

If the ownership of industries were determined by the distribution of their gross earnings, the holders of railway securities would be in partnership with 1.312,537 railway employes, who not only are the most numerous class interested in the presentity of the railreads but in the prosperity of the railroads, but divide by far the largest portion of the earnings among them. This great urmy of security holders and employes, with more than two million members, exceeds in number the total of the forces placed in the field by the Northern States during the Civil War.

Distribution of Earnings.

of the earnings of American railways went to the employes, 14.62 per cent. to the bondholders, and only 8.74 per cent, to the stockholders. Thus it appears that less than 24 per cent, of the income which the railroads derive from the stockholders and the persons of the income which the railroads derive from the distributed to the persons.

operation is distributed to the persons or corporations who are particularly identified in the public mind with the ownership of rillways.

Various attempts have been made to ascertain with some degree of accuracy the number of persons who own railway securities. An inquiry made a year ago showed that the total number of persons owning railway stocks and bonds persons owning railway stocks and bonds was about 800,000. Since then the Inter-state Commerce Commission in restate Commerce Commission in re-sponse to a Senate resolution on the subject, has stated that "the number of stockholders reported by the carriers in their annual reports for the year end-ing June 30, 1904, was 327,851." In trans-

ing June 39, 1994, was \$27,84." In transmitting these figures, Chairman Knapp
wrote: "It cannot, however, be said that
this figure accurately represents the
number of individuals interested in rallway securities."

How far it comes from fully representing the number of beneficiaries of rallroad stock may be judged from the feet
that no less than 79 per cent, of the
slock of one large railway company appeared on the books in the name of one
stockholder-a trust company. Besides
cases like this, the number of shareholders in the great holding companies
is only reported where such a company
s an operating road.

is an operating road.

In response to an inquiry, one official wyote: "These figures are for registered stock, but as many of these are bankers and brokers helding stock in their name for various clients, the actual number of stockholders will be greater."

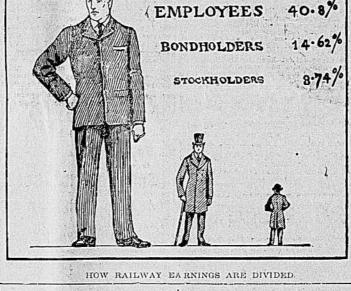

Another official, the comptroller of one of the largest systems, wrote: "It is very probable that the number of actual stockholders is twice as great as the number of registered stockholders."

The holdings of bonds by reason of their character as approved securities in estates and trusteeships must greatly exceed the holdings of stocks. So, in spite of the duplication of ownership in some cases, it is safe to say that the direct owners of raliway securities number between 700,000 and \$60,000.

Then there in the holding of raliway scurities by insurance companies and sayings banks. There are 17,00,000 life insurance policies in force, and all of their holders are indirectly interested in the prosperity of American raliways, because of the heavy investments made by the insurance companies in raliroad properties.

In 1960 these stock and bond holders divided 2444.07,250 among them, while the 1332,237 employes received \$775,321,415 as their share of the carnings of the roads. In September, 1960, the books of the large that of the Commission. More properly of the carnings of the roads. In September, 1960, the books of the large that of the Commission. More properly of the carnings of the roads. In September, 1960, the books of the large that of the Commission. More properly of the carnings of the roads. In September, 1960, the books of the large that of the Commission. More properly of the carnings of the roads. In September, 1960, the books of the carnings of the roads. In September, 1960, the books of the carnings of the roads. s an operating road.

In response to an inquiry, one official words: "These figures are for registered stock, but as many of these are southern Rallway, cred stock, but as many of these are

Registered Stockholders.

According to the report of the Interstate Commerce Commission, already referred to, the number of registered stockholders in some of the leading rallway companies was as follows:—
Pennsylvania Rallroad, 44,175
Atchison, Topcka & Santa Fe Ry, 17,823
Union Pacific Rallroad, 14,256
New York Central & Hudson R.
R. R. 11,782

11,782

employees' investment company covers several hundred investors.

per cent. hold between 100 and 500 shares and 18 per cent. hold over 500 shares each. The average holding has dropped to a fraction over 130 shares, of \$8,500.

The question of the regulation of railway rates is a big one, of interest to overybody, but it comes home with especial force to the two million railway employees and investors in railway securities whose incomes would be reduced by any legislation which injured the railway business. And this army of two millions represents, with the persons dependent upon them for support, at least one-eighth of the population of the United States.

Personals and Briefs.
